Galaxy warrior alien attack

Galaxy Warrior is a modern space shooter game with impressive 3D graphics and effects. Lead your ship through the vast expanse of space, destroying sinister aliens and powerful superiors.*It would seem that there is nothing to discover in the Solar System. But in the most remote corners of the Universe, mankind has become against ferocious resistance. You are the only one who can save the galaxy from alien race invaders! **【Main Features】** Classic Shoot 'em up gameplay. Galaxy Warrior features a modern take on the classic vertical shoot'em up genre, where you control a spaceship and shoot on incoming alien ships. Easy one-finger game management. Impressive graphics. Breathtaking graphics depicting the futuristic world of space e.3D with exceptional visual effects. Fight against menacing looking powerful bosses while enjoying stunning artsy graphics. Dynamic effects. The game has accelerometer support, slow motion WOW effects and tons of amazing explosions, lighting and post effects. Along with dynamic mechanics, you're up for the best shmup gaming experience. Support the full-screen game. In the device system settings menu, select the full-screen image format option. [Application permission required]* Access to photos, media, and files: You must install the program and save the program data to the device's memory. Be sure to save game data before deleting a game or switching devices._____ **【SHMUP HOLIC】** ShootingSpace WarAstro WingsFacebook : shmup.holic@gmail.com service Galaxy Warrior: Alien Attack 1.2.0 Description Galaxy Warrior: Alien Attack (package name: com.shmup.galaxywarrior.paid) developed by SHMUP games and the latest version of Galaxy Warrior: Alien Attack 1.2.0 was updated on 28 February 2020. Even without a fire button and with microcharges, pressing in return. Studio SHMUP Games (also known as SHMUP HOLIC) has some highly rated titles, all classic shot'em ups with colorful graphics, continuous action and thousands of projectile flashes on the screen. And the source of these joys in shooting at opponents is the South Korean city of Daejeon, where the SHMUP Games headquarters. While the natural environment of the shrehole is a wooden arcade cabin, a classic console with a cushion or a computer with a joystick, it must be acknowledged that the creators of Galaxy Warrior have captured the essence of the genre and built the perfect monster, even encouraging you to take the fate of the galaxy into your own hands. In fact, follow them with one thumb. Sometimes the emphasis is on the screen by double-tapping. Strange are the times when a large bust with an arcade stick and tons of emotions caused by how much we can fly on a single chip, we turn into a handheld computer screen, and we also play with extra money, but already optional. In any case - the use of micromokes only spoils the fun, because working from a better spaceship and weapons, coins earned in battle just taste better. An interesting fact remains that vertical screen orientation is more associated with arcade shooters than modern more shooting, even the iconic Ikaruga. Galaxy Warrior: Alien Attack proves that a well designed combat mechanic with a thoughtful user interface can create a smartphone screen with this silly control exciting game even without a button (The vehicle shoots itself, our role boils down to the aim, avoiding obstacles and collecting colorful gems, consisting of limited time boosters and nervously looking at the life bar and shields). Add to that two new combat vehicles to buy, some very different levels where sometimes we hook shot hell, sometimes we circle among meteorites, otherwise we deal with the boss hell and it's with the time limit. And an impressive graphic design, where the background sometimes happens as much as the foreground, and we will get time to eat a few long evenings. For real space warriors – one slightly longer evening, lazy dawn dawn. After so many hours of fighting, I can only suggest that Galaxy Warrior excites strange nostalgia for arcade arcades... Arcade...
